

MYAKALA NAGARJUN

Hyderabad, India · +91 9121792433 · myakalanagarjun@gmail.com · linkedin.com/in/nagarjun-myakala- · https://github.com/naga-012

PROFESSIONAL SUMMARY

Data Analytics fresher holds a Bachelor's degree in Engineering. Builds a strong foundation in data analysis, SQL, Excel, Python, Power BI and statistics. Data Analytics fresher is skilled in collecting, cleaning, analyzing and visualizing data to generate business insights. Data Analytics fresher gains hands-on experience through projects focused on data analysis and dashboard creation. Data Analytics fresher loves turning data into clear stories. Data Analytics fresher is a learner with strong analytical and problem-solving abilities, eager to contribute to data-driven decision-making, in a dynamic organization while continuously enhancing technical expertise.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **Libraries & Frameworks:** Pandas, NumPy, OpenCV, TensorFlow, FastAPI, Django
- **Databases & Analytics:** PostgreSQL, MySQL, Power BI, Advanced Excel, Statistics
- **Developer & AI Tools:** Git, GitHub, VS Code, Jupyter Notebook, Postman, RESTful APIs
- **Core Competencies:** Data Cleaning, Exploratory Data Analysis, Schema Design, Pipeline Optimization

PROFESSIONAL EXPERIENCE

Vangrove Tech Pvt. Ltd.

Hyderabad, India

Junior Analyst Intern

06/2026 – Present

- I accelerated report turnaround time by thirty-five percent by building automated Python and SQL extraction pipelines that processed than fifty thousand transactional records.
- I reduced reporting discrepancies by twenty-eight percent by putting in place data cleaning routines that tackled missing values, duplicate entries and schema errors.
- Item I improved visibility for senior stakeholders by creating interactive Power BI dashboards that followed more, than twelve critical business KPIs in real time.

PROJECTS

E-COMMERCE DATA

June 2025 – May 2026

Excel, Sql, Python and Power BI

- I analyzed 50,000+ e-commerce transactions using Python (Pandas, NumPy) to clean, transform and explore sales, customer, product and regional data.
- I developed 50+ MySQL queries using JOINS, CTEs, subqueries and window functions to analyze revenue, profit, customer behavior, product performance and sales trends.
- I performed customer segmentation using RFM analysis to identify Champions, Loyal, New, At-Risk and Lost customers and understand customer value and retention.
- I built a Power BI dashboard with KPIs including Revenue, Profit, Orders, Customers, Average Order Value, Profit Margin and Return Rate with dynamic filters for date, region, category and customer segment.

Healthcare Appointment Hospital

June 2025 – May 2026

Python, SQL, Excel, Power BI

- I examined than 100,000 healthcare appointment records with Python, Pandas and NumPy cleaning them transforming them and spotting trends among patients, hospitals, doctors and departments.
- I built over fifty MySQL queries that used JOINS, CTEs, subqueries, CASE statements and window functions to study hospital performance doctor workload, appointment trends and patient activity.
- I carried out exploratory data analysis pinpointing peak appointment times departments that're in high demand patterns of cancellations and no-shows how doctors are being used and trends in average waiting time.
- I created a Power BI dashboard that shows key performance indicators such, as Total Appointments, Completed Appointments, Cancellation Rate, No-Show Rate, Patient Count, Revenue and Average Waiting Time.

EDUCATION

Bharat Institute of Engineering and Technology

Hyderabad, India

Bachelor of Engineering – Information Technology (CGPA: 7.2 / 10.0)

2022 – 2026

Alphores Junior College

Karimnagar, India

Intermediate (10+2) (CGPA: 8.2 / 10.0)

2020 – 2022

ACHIEVEMENTS

- Saylor Academy Award: Introduction to Python.
